Jake's Corner

Hey everyone, It's me, Jake again. This month I want to talk to you guys about parking illegally on and around the campuses. Lately we have been seeing an increasing number of parking violations. A few things you should remember to avoid getting notices on your vehicles are; no parking in handicap spots, don't block in other cars, that's just not nice and not having a valid registration sticker on your license plate. If you are parked illegally and get a notification, you should always take immediate action. We want to prevent your car from being towed at your expense. See you guys around and don't forget to say 'Hey!'

JOIN THE JOB CLUB AND GET WORK READY

- Honing your Soft Skills

Community News

NAHA Family Self-Sufficiency

Willa Banet is our FSS success. She provides exceptional aging in place support to the seniors at New Albany Housing Authority. Willa is a very young 74. She has more energy than most 20 year olds. She single handedly raised 4 daughters. Willa is a remarkable lady! It is hard to go anywhere in So. Indiana where she is not known. She now works part-time and has the perfect job with Family Self Sufficiency. She helps elderly and disabled families by picking them up and driving them to doctor appointments, the local grocery store, the bank to cash their checks and much, much more. Just this

year alone, Willa has given our elderly 512 trips to the doctor and 523 trips to the grocery and does not stop there. Willa goes above and beyond in her role as "Transportation Aide" for the New Albany Housing Authority. She has become family for people who have no support. Willa not only drives people around all day long, she counsels and listens to them. Willa hugs and kisses and lovingly assists her passengers getting in and out of her van. She regularly plans lunches at our senior high rises. When she cooks a pot of her legendary chicken and dumplings, it will be standing room only. Willa has been an angel running around tirelessly with the perkiness of a person who loves what she does! Willa will find out who may not have a holiday meal and she will show up on Christmas or Thanksgiving with a steaming plate of yummy food. Willa gets up every day and truly makes a huge difference in the lives of everyone she meets. Whether it's a senior, a child or a young mom needing encouragement, she is a shining star. If you see Willa Banet out and about, give her a friendly wave! She is a BIG part of the FSS team and is appreciated for all she does, each and every day!

OPEN ENROLLMENT

WHERE? NAHA FSS Office 215 Erni Ave.

WHEN? Monday mornings 10:00 am to 11:00 am

Family Self Sufficiency case managers are waiting to support & coach you into a great career.

We offer Credit Repair, Home Ownership, Escrow savings and much more. **Call us today! (812) 206-2050**

JUST FOR YOU VETS...

To the men and women in uniform
Past, present and future...

The Housing Authority of the
City of New Albany, IN
300 Erni Avenue
P. O. Box 11
New Albany, IN 47150

America's Pipeline Network

There are over 300,000 miles of natural gas pipelines in the United States. Pipelines are the safest method of transportation. Natural gas provides about 24 percent of all the energy used in the United States.

Pipelines are made of steel, covered with protective coating and or PE plastic pipe buried underground. They are tested and maintained through the use of diagnostic tools and cathodic protection. You may recognize pipeline markers indicating the presence of underground gas lines, however, not all pipelines are marked and markers where present may not be located directly over the line. New Albany Housing Authority personnel will work with local police and fire departments in the event of an emergency.

Our hope is to be a good neighbor and provide you with information to help you avoid potentially dangerous activity near the gas lines in your area and to be able to recognize and respond to a possible gas leak.

If you have any questions or would like more information, please call New Albany Housing Authority at 945-2795.

NATURAL GAS SAFETY

Carbon Monoxide Awareness:

Carbon Monoxide can be very a by-product of an inefficient or improperly working gas fired appliance. Carbon monoxide is a colorless, odorless, poisonous gas that kills more than 200 people in the U.S. every year. Make sure your equipment is in good working order and properly vented. Check flues and chimneys to be sure they are clean and clear of debris.

Recognize a leak

Natural gas is lighter than air and will rise. Other heavier-than-air gases will stay near the ground and collect in low spots. Leaking natural gas is potentially dangerous.

Although it is a non-toxic it can displace the oxygen you breathe causing suffocation.

You can recognize a leak

- By Smell: A natural gas leak is indicated by the strong odor of the chemical, mercaptan, which is added to natural gas.
- By Sight: a dense white cloud over a pipeline, or discolored vegetation surrounding the gas line may be signs of a leak. Also blowing dirt, dust or bubbles in standing water.
- By Sound: an unusual noise coming from the natural gas line, like a hissing or roaring sound, may be a sign of a leak

What to do if I recognize a leak...

- Leave the leak area immediately
- If the leak is at your home, leave the door open as you leave
- Go to a safe location and call New Albany Housing Authority at 945-2795, giving your name and location of the leak.

What NOT to do if I recognize a leak...

- DO NOT light a match, turn on or off light switches, turn on flashlight or anything may create a spark
- DO NOT use the telephone, cell phone, television or radio
- DO NOT use an automatic garage door
- DO NOT turn on gas range or other gas appliance.

METER SAFETY

Each natural gas service is equipped with a meter(s) which serves the customer. If a gas line is accidentally broken and a leak is obvious – shut off any equipment or open flames in the area which might ignite the gas – evacuate the area and report the leak immediately to New Albany Housing Authority at 945-2795. In an emergency the gas to any house can be shut off at the meter.

Gas meters should be kept free from obstructions, such as trees and shrubs, to provide access to the meter for maintenance as well as in the event of an emergency.

CALL BEFORE YOU DIG

Before you dig or excavate, you **must** contact the I.U.P.P.S. – "One-call" system at **811**. You are required by state law to notify I.U.P.P.S. not less than 2 working days before digging, excavating or demolition activity begins whether

Continued on next page

landscaping, building fences or a major construction project. The member utility companies will send a representative to mark their underground lines at your site. **The call is free and so is the service.**

Calling before you dig, either by hand or with machinery, could prevent possible accidents, injuries or death. Remember IT'S THE LAW! DIAL 811.

Can I build or dig on a right-of-way?

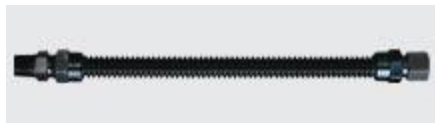

Natural gas pipeline rights-of-way must be kept free from structures and other obstructions to provide access to the gas line for maintenance, as well as in the event of an emergency. Do not dig or build near the gas line without first contacting NAHA.

What to do if you dig & disturb or damage a natural gas line:

Even if you cause what appears to be only minor damage to the gas line, notify New Albany Housing Authority at 945-2795 immediately. A gouge, scrape, dent, or crease to the pipe or coating may cause a future rupture or leak. It is important that NAHA inspects and repairs any damage to the line. Regardless of how minor the damage appears, don't cover it up!

Do not attempt to make repairs to the line yourself

SAFETY WARNING

Flexible gas connectors are used to bring gas from supply pipes to appliances such as stoves, dryers, and room heaters. They are made of corrugated metal tubing – newer models being fabricated from stainless steel or from brass that has been coated with plastic. Most older connectors, however, were made from uncoated brass.

Some of the uncoated brass connectors have a serious flaw in the way they were made. Solder was used to braze, or join, the flexible brass tubing to the new pieces. Over time, the brazing can fail causing a serious gas leak. This could lead to and explosion or fire.

It is very difficult to see whether a flexible connector has been brazed so don't take a chance. If you have an uncoated brass connector in your home, it should be replaced with either a new stainless-steel or a new plastic-coated brass connector.

In fact, it's a good practice to replace any flexible gas connector which is more than 10 years old. This is because flexible connectors are not meant to last a lifetime. Older

units can wear out from too much moving, bending or from corrosion. If you can, check your flexible connector without moving the appliance attached to it. If you cannot make this check without moving the appliance, we recommend that you have service contractor inspect the connector for you. Moving the appliance could strain the connector, possibly causing a gas leak. So, if your appliance must be moved, it's best to have a professional on hand to do it.

If a replacement is needed, make sure the new connector is certified by the American Gas Association (AGA) and conforms to the American National Standards Institute (ANSI) standard Z21.24.

Remember, if you think you have a gas leak in your home from a flexible connector or from any other source – call us immediately at 945-2795.

If the odor of gas is strong, leave immediately and make the call from a neighbor's phone. Take care not to operate appliance or turn light switches on or off.

**AFTER HOURS EMERGENCY PHONE NUMBER
812-945-2795**

New Albany Housing Authority's Natural Gas Safety Program

The Housing Authority owns and operates the natural gas utility on its properties in full compliance with state and federal pipeline safety rules and regulations. Actions that the Housing Authority performs to ensure natural gas pipeline safety include but may not be limited to:

1. Annual underground leakage surveys
2. Annual cathodic protection surveys
3. Pipeline patrolling
4. Odor Sniff Testing
5. Valve maintenance
6. Operator training
7. The creation and upkeep of an Operations, Maintenance and Emergency Manual
8. Line locates when others are excavating on site
9. Maps of all facilities are kept up to date.
